BISHOP WHITAKER'S

SCHOOL FOR GIRLS, RENO.

This School has been in successful operation

for three years and a half, and has become well

known throughout the State. From the time it

was first opened until now no pains have been

spared on the part of those who have it in charge

to make it a success.

FIRST-CLASS SCHOOL.

Fully worthy the confidence of those who have

daughters to be educated. And these efforts

have been successful. It gives us pleasure to

say that, although the number of scholars has at

some time been larger than during the last term,

the School is now in better condition than it

has ever been, and it is now, more than

ever before, worthy of patronage and support.

TEACHERS:

Miss Kate A. Hill, the first Principal, returned

and resumed her position at the beginning of the

new term, to the great satisfaction of every

scholar, and friend of the school. Mrs. L. H.

Graham has also returned, and with Miss Hill

will be re-identified with the school. Miss

Eva Quisette, the teacher of music, is too well

and favorably known to need any commen-

tary from us. In addition to these, the R. V.

R. Jenvey, Miss Julia S. Woodford, and Miss

Brown, three thoroughly competent teachers

have been employed during the new term. Ad-

dition to the staff of the school, will be made, when

ever the wants of the School may require it; but

with thirty scholars, the number in attend-

ence during the last term, six teachers are amply

sufficient to do full justice to every scholar

while special attention is given to the

scholar who is most in need of attention.

Common English Studies.

And to the health and good manners of scholars,

there is not wanting every facility needed for

acquiring all the accomplishments of a

higher education.

One admirable feature of the School is that

lessons in Free Hand Drawing, Singing and Pen-

manship are given regularly to all the pupils

without extra charge. Calligraphy and Physi-

cal Training also receive due attention. But the

best feature of the School is that it is a

Refined, Cultivated, Christian Home.

It is in the formation of a pure womanly char-

acter in its pupils that its best and most endur-

ing influence is to be found. There are few who

have been long connected with the School who

do not show the effect of this influence upon

their character and habits. The charges are

now as they can reasonably be placed.

Letters of inquiry and applications for admis-

sion should be made to

SUNDAY.....APRIL 11, 1880.

NEWS OF THE MORNING.

Whittaker, the West Point cadet yesterday testifies that he had no conversation with his assailants except to beg them not to cut his ear. He stated that an oath was binding on his conscience, and he firmly believed a false oath involved future punishment. At the request of the Recorder he then took an oath, looking squarely in the face of the Recorder, that all he said was true.

At Sacramento Friday evening the State Senate directed that Senator Kane be confined by the Sergeant-at-Arms until he purges himself of contempt, and also deprived him of all rights as a Senator. A motion to expel him was voted down. Kane still refuses to tell the name of the person that he alleges attempted to bribe him with a thousand dollars to vote for a certain bill.

Kane was taken to jail by the Sergeant-at-Arms at 1 o'clock yesterday morning and placed in a cell.

A letter reached in Washington yesterday from a prominent Pacific Coast politician, now in New York, and who is on confidential terms with Governor Seymour, says that Seymour will most positively not be a candidate for President under any circumstances, and will use whatever influence he can command in behalf of Justice Field. The writer, who is on intimate terms with Tilden, expresses the belief that he will not push his own claims before the National Convention, but will support Justice Field.

THE COMSTOCK.

The market has been going from bad to worse during the past week. Things are liable to continue rough for another week, or until the big pumping machinery at the Union shaft is in successful operation. At the north-end mines there is now all the water that can be handled and no move for the purpose of showing up ore can be made at any point until the big pump is ready to take the extra water that will at once be tapped.

The work of repairing the broken pump bobs at the Union shaft is progressing rapidly and the management say that the pumps will be ready to be started up again the last of next week.

At the Union Consolidated the usual amount of good milling ore is being taken out, and the east winze from the 2400 is already down to the 2500 level, where a drift will be started west to connect with the Sierra Nevada 2400 station as soon as a sump has been sunk.

Winze No. 2 on the 2100 level of the Opin is down 50 feet, and will be pushed through the ore body on which it is being sunk in such a way as to follow that portion which promises best, as in this place is supposed to be the key to the ore formations of the mine. The east crosscut on the 2500 level continues in metal-bearing material and the chances are good for finding ore in that direction, as to the eastward lies a boundless region of unexplored ground.

At the Sierra Nevada the winze from the 2400 level has reached the 2500 level and a drift toward the station will be started. The uprise will connect with the east shaft to-day, when the north drift on the 2400 level will again be advanced. Little new work can be undertaken till the big pump at the Union shaft starts up.

The Chollar folks are rapidly pushing south toward the Potosi on the 2400 level.

At the Belcher they are drawing off the water on their 3000 level preparatory to crosscutting east.

They will begin crosscutting on the 1950 of the Alta and Beaton in two or three days.

The Quinn shaft is being pushed for the 200 level.

At the Julia they will shut down to-night and will hereafter work through the Ward shaft, arrangements to that effect having been perfected below.

Better ore is being found in the North Bonanza and Flowerly. [Enterprize 10th.]

It is reported that the managers of the Comstock mine are about to solicit the co-operation of the Miners' Unions of Virginia City and Gold Hill in a general movement to reduce expense and make assessments lighter.

The Oregon Democrats have declared for Tilden and Hendricks. Suite us.

Reform Club Speakers.

The next four meetings of the Reform Club will be first-class, so far as the addresses are concerned. First comes Mr. Jenvey, then Bishop Whittaker, next Gen. R. M. Clarke on "The Relations between Labor and Capital," to be followed by Hon. Wm. Wooburn, on "The Virtues of the Jews."

There will be divine service in the Methodist Episcopal Church to-morrow at 11 a. m. and 7 p. m., Rev. C. McElvey officiating. Subject for the evening, "Preachers and other people, here and elsewhere." Seats free; all are invited. Sabbath School at 1:30 p. m.

Yesterday was a beautiful day so far as the weather was concerned.

The Evans' are sowing wheat on the 60 acres up by the big reservoir.

OF INTEREST TO MINERS.

The Time When Annual Assessment Work Shall be Performed.

Prior to the passage by Congress of what is known as the mining law of 1852, the miners of the several districts made rules and regulations for locating, recording and doing assessment work on the mines of the respective districts. The Congressional law made it obligatory on all mine-owners to perform a certain amount of labor annually each claim located but omitted to state when the assessment year began. This caused disputes among miners and resulted in litigation, when the mines in dispute were supposed to be valuable. Some held that on claims located prior to the passage of the Act of 1852, the assessment year expired on the 31st day of December of each year, and that on claims located since the passage of that Act, the year expired twelve months from the date of their location. The law of Congress specified no particular time when the claim should be recorded or work done.

Now, all disputes as to the time the assessment year ends are settled by an amendment to Section 2,824 of the Revised Statutes of the United States. That amendment provides, "That the period within which the work required to be done annually on all unpatented mineral claims shall commence on the 1st day of January succeeding the date of location of such claim, and this section shall apply to all claims located since the 10th day of May, A. D. 1872." The amendment evidently means that if a mining claim is located at any time after the 1st of January of each year, the locators have until the 1st of January following to make the expenditure on the claim required by the Act of 1862. The local laws of many mining districts require a certain amount of work to be done on newly located claims within thirty or sixty days from the date of location, and probably the Courts will have to determine whether such laws are in conflict with the Act just passed by Congress. The law of Congress, however, being the supreme authority would seem to take precedence over any mere local regulation. The above explanation is given by the Eureka Sentinel in answer to numerous inquiries addressed to that office by miners and mining men.
